PROFESSIONAL PROFILE

Full Stack Developer specialized in the Java Spring Boot ecosystem, focused on designing high-performance back-end architectures, integrating IoT solutions, and managing real-time data flows. With solid experience in Agile methodologies and cross-functional skills (Front-end, DevOps), I am committed to delivering robust, scalable web applications centered on business needs.

TECHNICAL SKILLS

Back-end: Java, Java JEE, Spring Boot, Python, Django, PHP, Laravel, Node.js, Express.js, JUnit, Unit Testing, TDD
Front-end: Angular, React, Next.js, TypeScript, JavaScript, Tailwind CSS, CSS
Databases & ORM: PostgreSQL, MySQL, MongoDB
Tools, DevOps & Practices: Docker, CI/CD (GitHub Actions), Microservices, Apache Kafka, WebSocket, Postman, Git, GitHub
Methodologies: Agile, Scrum (Sprint planning, Daily stand-ups), UML Modeling

PROJECTS

Detailed portfolio of over 45 practical projects available on my GitHub profile.

EcoSim 2.0 Full-Stack Developer
Tech Stack: Java, Spring Boot, Spring AI, Angular, PostgreSQL, Google Maps API, JUnit, Mockito, Docker, GitHub Actions

- Development of a comprehensive web mapping application designed to calculate travel costs and assess the ecological footprint of specific routes.
- Utilized Java and Spring AI on the back-end to intelligently process route data and generate accurate ecological simulations.

Parcel Management System Back-End Developer
Tech Stack: Java, Spring Boot, Spring Security, Spring AI, Angular JWT, MongoDB, Docker, GitHub Actions, JUnit, Mockito, Swagger

- Design and development of a secure REST API for shipment management, integrating JWT authentication and role-based access control (Admin/Delivery Driver).
- Implementation of an automated assignment module to allocate parcels based on each delivery driver's specialty using Spring Data MongoDB.
- Ensured code reliability with JUnit and Mockito, and implemented automated CI/CD pipelines with Docker and GitHub Actions.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Internship Nexas Solution, Casablanca
Technical Environment: Node.js, Express.js, Next.js, Docker, Git, GitHub, GitHub Actions, Postman June 2025 - August 2025

- Web Development & Redesign:** Designed and developed the company website, integrating a transition to a dynamic architecture (headless CMS) to enable autonomous content management by non-technical users.
- API Creation & Integration:** Developed custom back-end features, created dedicated APIs, and consumed data to ensure a seamless and optimized user experience.
- E-commerce Extension Development:** Designed and implemented a dashboard management application to enhance and administer the features of the online sales platform.

EDUCATION

Full Stack Web Development YouCode (Simplon / UM6P), Safi
2024-2026
Bachelor's Degree in Physical Sciences Faculty of Sciences Semlalia Marrakesh
2018-2022
